EDUCATION

Singapore University of Technology and Design (SUTD)

Singapore

Bachelor of Science in Design and Artificial Intelligence, minoring in Computer Science (Honours with Merit)

September 2021 - May 2025

WORK EXPERIENCE

Tartine.byjanice, Founder & Operator

January 2020 - Present

- Founded and operated a home-based business, owning end-to-end product development, branding, and customer experience
- Managed marketing strategy, order fulfillment, and quality control, building strong customer relationships
- Developed strong ownership, time management, and problem-solving skills through hands-on business operations

Bonsai Kedai Lama, Social Media Manager

March 2026 - Present

- Lead end-to-end social media strategy, producing photo and video assets to drive brand exposure and customer engagement
- Direct marketing campaigns and publicity efforts to increase restaurant visibility and market share
- Streamline restaurant flow and workflow efficiency by supervising staff and optimizing guest placement strategies

PT. Prima Gracindo, Part-time Frontend Developer

May – Sep 2024

- Led frontend revamp of company internal web application using React, improving usability and visual consistency
- Designed and iterated UI/UX flows in close collaboration with stakeholders to align business needs with user experience
- Built reusable components and integrated APIs to support scalable feature development

Ernst & Youngs Digital and Emerging Tech Singapore, Technology Intern

Aug – Dec 2023

- Contributed to 2 enterprise microservice web applications, focusing on frontend development using TypeScript
- Integrated REST APIs and real-time data using SignalR, supporting dynamic user interactions
- Owned and delivered 2 application modules, including debugging, testing, and client-facing demos
- Collaborated with cross-functional teams in an agile environment and presented solutions to clients

PT. Prima Gracindo, Product Designer Intern & Data and Sales Assistant Manager

Jan 2020 – Jul 2021,

- Designed product and marketing assets using Adobe Illustrator, Photoshop, and Vectornator
- Analyzed sales and operational data to support decision-making and process improvements
- Collaborated with cross-functional teams to align design and data insights with business goals

ACADEMIC RESEARCH PROJECTS

Singapore University of Technology and Design

[Figures Lite Financial Planning Tool](#), Team Member & Web Developer (CAPSTONE)

- Built a financial planning web application for advisors and clients in collaboration with a startup partner
- Led frontend development and UI/UX design for property financing and forecasting workflows
- Adapted to a major mid-project scope change, redesigning user flows to avoid product overlap and deliver clearer user value
- Focused on usability, clarity, and stakeholder communication under evolving requirements

[Spatial Planning Tool](#), Team Member & Web Developer

- In collaboration with Singapore Arts Museum (SAM), my team and I are tasked to help SAM automate their spatial planning process into a tool for their exhibitions, whilst considering all the must follow guidelines and conservation details
- Contributed as the project manager, UI/UX Designer, as well as the Front-End Developer of the application

[CPF Dashboard](#), Team Manager & App Builder

- Built an internal forecasting dashboard using Python and Streamlit to support automation and digitalization forecasting system
- Worked with a client to translate requirements into structured data models and visual outputs

[Skin Cancer Detection](#), Team Member (Computational Data Science and Applied Deep Learning)

- Developed CNN-based model for early skin cancer detection using computer vision as part of a deep learning coursework project

[News Aggregator](#), Team Member / Front-end Developer

- Worked in a team in collaboration with DNATA to help them collect useful news and connect with their team members
- Mainly helped in designing the UI/UX and front-end development using Javascript, Ruby, Google Cloud Services and Figma

[Food place Availability & Queue Status \(FAQs\)](#), Team Member / Front-end Developer, UI/UX Designer

- Built a web-based FAQ system integrating frontend and backend logic to streamline customer information access and HCI

Device for Gaming Tilt Detection, Team Member

- Built a sensor-driven tilt detection system in collaboration with [Nugen.AI](#) using Arduino to capture and process real-time motion data, translating hardware inputs into reliable software signals and displaying it into a website

CO-CURRICULAR ACTIVITIES

SUTD Student Government (ROOT), Director of Events & Welfare**Feb 2022 – Feb 2023**

- Led planning and execution of student initiatives and large-scale events
- Coordinated cross-functional teams and managed stakeholder communication

Sports & Activities: Archery, Badminton, Tennis**ADDITIONAL INFORMATION**

Technical Skills

- **Frontend & Web:** React, TypeScript, JavaScript, Redux, SignalR, REST API Integration, Streamlit
- **Backend & Data:** Python, FastAPI, Ruby on Rails, R,
- **Design & Prototyping:** Figma, Miro, Adobe Illustrator, Photoshop, Framer, Sketch
- **Hardware / Systems:** Arduino IDE, Rhino, Grasshopper, Autodesk Fusion 360
- **Cloud & Platforms:** Google Cloud Platform (GCP), Microsoft Azure, Git
- **Tools:** Microsoft Office (Word, Excel, PowerPoint)
